The heart of hospice

Hospice is a compassionate, patient-centered approach in caring for individuals with a serious or life-limiting illness. The primary goal is to make patients' end-of-life journey as comfortable and peaceful as possible, with a strong emphasis on alleviating pain and symptoms, rather than curative interventions.

Because serious illness also affects the entire family unit, hospice care provides comprehensive services for both patient and loved ones alike, addressing their multiple physical, emotional, spiritual, and social needs.

The Serenity Difference

Our carefully cultivated Serenity team is characterized by their exceptional skill, compassion, and sensitivity. They understand the emotional roller coaster; they are passionate about providing families with relief and treating patients with dignity and love. Whether administering medication, bathing a patient, holding a hand at bedside, or providing a listening ear and a caring hug, our caregivers are there for you every step of the way.
